

NOTE

- 1. The scheme and detailed contents for 2002 and 2003 batches are same except BC-301 Mathematics-II (Computer Oriented) and BC-403 Computer system Architecture has been interchanged between 3rd and 4th semester.**
- 2. The scheme and detailed contents for 2003 and 2004 batches are same but one theory paper namely BC-105 Communication Skill is changed as practical only.**

BCA COURSE STRUCTURE**Batch : 2004**

SEMESTER – I		L	T	P	Int	Ext	Total
BC-101 (N2)	Information Technology	3	1	0	40	60	100

Introduction to Information Technology**BC-101(N2)****Max. Marks 100****Internal Assessment 40****External Assessment 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Use of non-programmable scientific calculator is allowed

Computer Fundamentals: Number Systems, History of Computers, Block diagram of computer & detailed significance of each part.

Study of I/O devices : Keyboard, Hard disk, Floppy disk, CD-ROM, DVD, Plotters, Scanners, mouse, Printers: Dot matrix, Laser, Thermal Inkjet, VDU.

Primary & secondary memories.

Introduction to Operating Systems & its functions

Definition of Simple batch processing, multiprogramming, multiprocessing, real-time, time-sharing systems, Concept of Spooling,

Typical DOS commands, making simple batch files.

Application of Computers in various fields : Defense, Industry, Management, Sports, Commerce, Internet.

Computer and communication: Single user, Multi-user, Workstations, and Overview of LAN, WAN: Overview of modem, E-Mail, Fax
Internet facilities through WWW

MATHEMATICS (BRIDGE COURSE)**BC-102(N2)****Max. Marks: 100**
Internal Assessment: 40
External Assessment: 60**Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Set relations and functions: elements of a set, methods of describing a set, types of set, Venn diagram, operations on sets, union, intersection and difference of set, Duality, partitioning of a set, trigonometric functions.

Binomial theorem and principle of mathematics induction

Introduction to matrix, properties of matrix; evaluation of determinant, minor and cofactors and properties of determinant

Statistics: introduction to statistics, collection, and tabulation of data, mean, median and mode.

Refresher Course On Mathematics Vol: 2--- Manjit Singh
ABC Of Mathematics J.P Mahendru

Note: This course is compulsory for all the students.

Basic Accounting**BC-103(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment: 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Section B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Basic Accounting: Introduction, importance and scope, concepts and conventions-
Generally accepted accounting principles-double entry framework
Basic concepts of Journals, ledgers, purchase book, sales book, cashbook.

Preparation of financial statements: Profit and loss account and balance sheet.

Nature, scope, advantage and limitations of management accounting.

Sources of raising of capital in corporate undertaking –simple treatment to issue of shares, forfeiture of shares and re – issue of forfeited shares.

Application of computers in accounting.

Programming in 'C'**BC-104(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment: 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Fundamentals: Character set, Identifiers & Keywords, Data Types, constants, set, constants, variables, expressions, statement, symbolic constants.

Operations and expressions: Arithmetic operators, unary operators, relational and logical operators, assignment and conditional operators, and library functions.

Data input and output: Preliminaries, single character input, single character output, entering input data, more about the scanf function, writing output data, more about printf function, the gets and puts function, interactive programming.

Control statements: Preliminaries, while, do-while and for statements. Nested loops, if else, switch, break continue statement.

Functions: Brief overview, defining accessing function, passing perimeters to function, specifying argument data types, function prototype and recursion.

Program structure: Storage classes, automatic, external, and static variables, more about library functions.

Array: defining and processing an array, passing pointers to a function, pointer and one dimensional arrays, operations on pointers, passing functions multidimensional arrays of pointers, passing functions to the other functions, more about pointer declarations.

Structure And Unions: Defining and processing a structure, user defined data types, structure and Pointers, passing structure to function, self-referential structures, unions.

Data files: Opening, closing, creating, and processing and unformatted data field.

C-programming applications: Sorting (Bubble sort, Selection sort), Searching (Binary search, Linear Search).

BC-106(N2)	Practical S/W Lab I	Max. Marks 100	
		Internal Practical	40
		External Practical	60

Based on BC 101 & BC 103

Familiarizing with PC and WINDOWS commands, file creation, editing and directory creation. Mastery of DOS commands. Learning to use MS Office: MS WORD, MS EXCEL & MS PowerPoint.

Familiarizing with any accounting package.

Practical Software Lab –II

BC-107(N2)

Max. Marks 100

Internal Assessment 40

External Assessment 60

Paper BC-104

Note: Program should be fully documented with simple I/O data. Flow charts should be developed wherever necessary.

Write program in 'C' language

- 1.Using input and output statements
- 2.Using control statements
- 3.Using functions
- 4.Using arrays
- 5.Using structure
- 6.Using files
- 7.To sort an array using different methods
- 8.To search an element from array

PRINCIPLES OF MANAGEMENT**BC- 201(N2)****Max. Marks 100****Internal Assessment: 40****External Assessment: 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Forms of business organizations and ownership: Sole proprietorship, Partnership, Joint stock company, Public & Private undertakings, Government companies.

Management: Meaning & definition of management, nature, scope and its various functions.

Planning : nature and purpose, types, steps in planning ,decision making : Strategic , tactical and operational decision, decision making process, rationality in decision making.

Organizing : nature, importance, the organizing process, organizational objectives, formal and informal organization, organization chart, span of management : factors determining effective span,
 Departmentation : definition, departmentation by function, by territory, product/service customer group ;
 management by objectives (MBO), Delegation, Decentralization v/s centralization.

Staffing : definition, manpower management, factors affecting staffing, Recruitment and selection ,
 Performance appraisal .

Motivation: theories of Motivation; hierarchy of needs theory, theory of X and theory of Y.

Leadership : styles, theories of leadership : trait approach and situational approach, managerial grid.

Controlling : meaning & nature , steps in controlling , essentials of effective control systems.

System Analysis and Design**BC-202(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment: 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

System Concepts: Definition, characteristics, elements & types of system.

System development life cycle: Recognition of need: Feasibility study, system analysis-introduction, information collection, interviews, questionnaires, observation, record searching and document analysis, analysis tools, data flow diagram, data dictionary, decision tree, structured English and decision table.

System Design: The process and stages of systems design, input/output and file design; System Implementation: System implementation, system testing, implementation process and implementation methods; system maintenance.

BC-203(N2)

Mathematics-I (Discrete Maths)

Max Marks: 100
Internal Assessment: 40
External Assessment 60

Instruction for paper setter

The question paper will consist of three sections A, B and C. Sections A and B will have four questions each from the section A and B of the syllabus and will carry 10 marks each. Section C will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt two questions each from section A and B and the entire section C. Use of non-programmable scientific calculator is allowed

Section A

Set theory. Relations and functions: Set notations and description, subsets, basic set operations. Venn diagrams, laws of set theory, partition of sets, min sets, duality principle, basic definitions of relations and functions, graphics of relations, properties of relations; injective, surjective and bijective functions, composition.

Combinations: Rule of products, permutations, combinations.

Algebra of Logic: Propositions and logic operations, truth tables and propositions generated by set, equivalence and implication laws of logic, mathematical system, and propositions over a universe, mathematical induction, quantifiers.

Section B

Recursion and recurrence: The many faces of recursion, recurrence, relations, and some common recurrence relations, generating functions.

Graph theory: Various types of graphics, simple and multigraphs, directed and undirected graphs, Eulerian and Hamiltonian graph, graph connectivity, traversals, graph optimizations, Graph coloring, trees, spanning trees, rooted trees, binary trees.

Data Structures**BC- 204(N2)****Max Marks 100****Internal Assessment 40****External Assessment 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Introduction to Data Structure: Basic concept of data, Problem analysis , algorithm complexity, Big O notation and time space trade off.

Stacks & Queues : Basics of stacks and queues, Recursion, Polish notation, circular Queues, priority Queues.

Linked Lists : Single linked list, circular linked list, doubly linked list and dynamic storage management, generalized list, Garbage Collection.

Trees : Definition & Concepts, Basic trees, Binary tree representations, threaded storage representation, binary tree traversals, and application of trees.

Searching and sorting : use of various data structures for searching and sorting, linear and binary search, insertion sort, selection sort, merge sort, bubble sort, quick sort, Heap sort.

An Introduction to Data Structures Applications

Digital Circuits & Logic Design**BC-205(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment 60****Instruction for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Introduction : Overview of number system and codes. Elements and functions of digital Logic gates, Gate propagation delay time, logic gates applications.

Boolean algebra: Boolean operations, SOP and POS forms, and simplification using karnaugh maps, Realization of expressions using goals.

Combinational logical circuits: design of Binary Adder-Serial, Parallel, Carry look ahead type. Full subtractor, code converters, MUX and DEMUX, encoders and encoders.

Sequential logic circuits: Flip flop: R-S, J-K, Master slave J-K, D and T flip-flops using nand gates.

Counters: Design of asynchronous and synchronous, updown and programmable counters.

Registers: shift registers, various types and their applications.

Detection and correction codes, detecting and correcting an error.

Practical Hardware Lab - I**BC-206(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment: 60**

 Paper BC 205

Note: A subset of following experiments has to perform.

1. To study the functions of basic logic gates and verify the truth table of AND, OR, NOT, X-OR, NAND, NOR.
2. To study applications of AND, OR, NAND, X-OR gates for gating digital signals.
3. To develop the different Arithmetic Circuits:
 - (a) Half-Adder and Subtractor
 - (b) Full-Adder and Subtractor
4. To study the BCD to Binary and Binary to BCD Code converter.
5. Study of Decoder Circuits:
 - (a) BCD-to-Decimal Decoder
 - (b) BCD-to-7-Segment Decoder
6. Study of Encoder Circuits:
 - (a) BCD-to-Decimal Encoder
 - (b) Octal-to-Binary Encoder
7. To study the flip flop circuit using Gates:
 - (a) R-S Flip Flop
 - (b) J-K Flip Flop
 - (c) Master Slave J-K Flip Flop
 - (d) D-Flip Flop
8. To study the R-S, J-K and D Flip Flop Using IC's.
9. Study of Shift Register.
10. Study of Ring Counter.
11. Study of Asynchronous and Synchronous Counters.

Practical Software Lab -- III

BC- 207(N2)

Max Marks 100
Internal Assessment 40
External Assessment 60

Paper BC 204

Note: Program should be fully documented with sample I/O data Flow charts should be developed wherever necessary.

Write program in C

1. To insert and delete a node in a linked list
2. To add two polynomials using linked list
3. To insert and delete a node in a circular linked list.
4. To implement a stack using arrays and linked list.
5. To implement a queue using arrays and linked list.
6. To invert a linked list.
7. To merge two arrays.
8. To solve polish expression using stacks.
9. For tower of hanoi problem using recursion.
10. To insert and delete node in binary search tree
11. To find traversals of expressions using binary tree
12. To search an element using binary tree.

Computer System Architecture**BC-301(N2)****Max. Marks: 100****Internal Assessment: 40****External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Computer Organization & Design: Instruction codes, op-codes, Computer Registers, Computer Instructions, Timing and Control, Instruction Cycle, Memory reference instructions, CPU: Stack Organization, Instruction format, Addressing Formats.

Control Unit Architecture, I/O Architecture: Transfer of Information among I/O devices, CPU, Memory and I/O ports.

Memory System, Storage technologies, Memory hierarchy, Memory mapping, Main memory and Auxiliary memory, Associative and Cache memory

Introductory study of 8-bit Microprocessor

Software Engineering**BC- 303(N2)****Max. Marks: 100
Internal Assessment: 40
External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Software: Characteristics, Components, Applications, Software Process Models: Waterfall, Spiral, Prototyping, Fourth Generation Techniques, Concepts of Project Management, Role of Metrics & Measurements.

S/W Project Planning: Objectives, Decomposition techniques: S/W Sizing, Problem-based estimation, Process based estimation, Cost Estimation Models: COCOMO Model, The S/W Equation, System Analysis: Principles of Structured Analysis, Requirement analysis, DFD, Entity Relationship diagram, Data dictionary.

S/W Design: Objectives, Principles, Concepts, Design methodologies: Data design, Architectural design, procedural design, Object -oriented concepts

Testing fundamentals: Objectives, principles, testability, Test cases: White box & Black box testing, Testing strategies: verification & validation, unit test, integration testing, validation testing, system testing

Object Oriented Programming using C++**BC- 304(N2)****Max Marks: 100
Internal Assessment: 40
External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Introduction: Object oriented programming, characteristics of object orientated languages, classes, C++ basics: Program Statements, Variables and constants, Loops and Decisions.

Functions: Defining a function, function arguments & passing by value, arrays & pointers, function & strings, functions & structures.

Classes & Objects: Defining class, class constructors and destructors, operator overloading.

Class Inheritance: Derived class & base class; Virtual, Friends and Static functions; Multiple inheritance, Polymorphism.

Input/output files: Streams, buffers & iostreams, header files, redirection, file input and output.

INTRODUCTION TO MICROPROCESSOR**BC- 305(N2)****Max Marks: 100
Internal Assessment: 40
External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Introduction to Microprocessor, its historical background and its applications.

INTEL 8085

Introduction, Microprocessor Architecture and its operations, 8085 MPU and its architecture, 8085 instruction cycle, 8085 Instructions :Data Transfer instructions, Arithmetic instructions, logical instructions, Branch instructions, RISC v/s CISC processors.

INTEL 8086

Introduction, 8086 Architecture, real and Protected mode memory Addressing, Memory Paging Addressing Modes.

Various types of instructions: Data movement, Arithmetic and logic; and program control. Type of instructions, Pin diagram of 8086, clock generator (8284A)

INTERRUPTS:

Introduction, 8257 Interrupt controller, basic DMA operation and 8237 DMA Controller, Arithmetic coprocessor, 80X87 Architecture.

BC-306(N2)

Max. Marks 100
Internal Assessment 40
External Assessment 60

Paper BC-304

Note: Program should be fully documented with simple I/O data. Flow charts should be developed wherever necessary.

Write program in 'C++' language

1. Using input and output statements
2. Using control statements.
3. Using functions.
4. Using array
5. Using Classes and implementation of Constructor and Destructor.
6. Using files.
7. Using OOP's Concepts (Inheritance, Polymorphism, Encapsulation, Friend and Static Functions)

Practical Hardware Lab - II**BC-307(N2)****Max. Marks 100
Internal Assessment 40
External Assessment 60**

Paper BC 305

Using 8085 and 8086 microprocessor kits do the following programs:

8085

1. To examine and modify the contents of a register and memory location.
2. To add two hexadecimal nos.
3. To subtract two hexadecimal nos.
4. To add two hexadecimal nos. The result should not be greater than 199.
5. To add two sixteen bit nos.
6. To subtract two sixteen bit nos.
7. For addition of 8 bit no series neglecting the carry generated.
8. To separate hexadecimal number into two digits (Breaking the byte into two nibbles).

8086

1. To add two binary nos each 8 bit long.
2. To add two binary nos each 8 bit long.
3. To find the maximum no in a given string (16 bytes long) and store it in a particular location.
4. To find the minimum no in a given string (16 bytes long) and store it in a particular location.
5. To sort a string of a no of bytes in descending order.
6. To multiply an ASCII string of eight numbers by single ASCII digit.
7. To calculate the no. of bytes in a string starting from a particular location up to an Identifier (data byte) placed in AL register. Store the actual count in a particular memory Location.
8. To multiply two nos.

Computer Networks**BC-401N2)****Max. Marks 100****Internal Assessment 40****External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Data communications concepts: Digital and analog parallel and serial synchronous and asynchronous, simplex, half duplex, full duplex, multiplexing.

Communication channels: Wired transmissions: Telephone lines, leased lines, switch line, coaxial cables-base band, broadband, optical fiber transmission.

Wireless transmission: Microwave transmission, infrared transmission, laser transmission, radio transmission, and satellite transmission.

Communication switching techniques; Circuit switching, message switching, packet switching.

Network reference models; Network topologies, OSI references model, TCP/IP reference model, comparison of OSI and TCI reference model.

Data link layer design issue: Services provided to the network layer, framing, error control, flow control HDLC, SDLC, data link layer in the internet (SLIP, PPP).

MAC sub layer: CSMA/CD, IEEE standards, FDM, TDM, CDMA.

The Network Layer: Design Issues, Routing Algorithms: Optimality principled, shortest path routing, Concept of Internet Working.

Data Base Management System

BC-402(N2)

Max. Marks 100

Internal Assessment 40

External Assessment: 60

Instructions for paper setter

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

An overview of the DBMS: Concept of database system, Database Administrator and his responsibilities. Physical and Logical data independence. Three level Architecture of database system: the external level, conceptual level and the internal level.

Introduction to Data Models: Entity Relationship Model, Hierarchical, Network and Relational Model. Comparison of Network, Hierarchical and Relational Model.

Relational data model: Relational database, relational algebra and calculus, SQL dependencies, functional, multi-valued and join, normalization.

Database protection: Recovery, concurrency, security, integrity and control.

Distribute database: Structure of distributed database, design of distributed databases.

Mathematicss - II (Computer Oriented Methods)**BC-403(N2)****Max Marks: 100
Internal Assessment: 40
External Assessment: 60****Instruction for paper setter**

The question paper will consist of three sections A, B and C. Sections A and B will have four questions each from the section A and B of the syllabus and will carry 10 marks each. Section C will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt two questions each from section A and B and the entire section C. Use of non-programmable scientific calculator is allowed

SECTION A

Matrix Algebra: Introduction of a matrix, its different kinds, matrix addition and scalar multiplication, Multiplication of matrices, Square matrix, Rank of a matrix, Transpose, Adjoint and Inverse of a matrix

Solving simultaneous equations using Gauss elimination method, Gauss Jordan Method and matrix inversion method

Statistics : Measures of central tendency. Preparing frequency distribution table, arithmetic mean, geometric mean, harmonic mean, median and mode. Measures of dispersion: Range, mean deviation, standard deviation, co-efficient of variation, moments, Skewness and Kurtosis

SECTION B

Differential Calculus: Introduction, Differentiation, Derivative of a Function of One Variable, Power Function, Sum and Product of Two Functions, Function of a Function, Differentiation by method of substitution, Maxima and Minima

Integral Calculus: Indefinite Integral, Integration by substitution, integration by parts,, Integration by partial fractions, definite integral.

Numerical integration : Trapezoidal method, simpson's 1/3 rule, simpson's 3/8 rule.

Command Execution	30 marks

Internet Applications and Java**BC-501(N2)****Max. Marks 100
Internal Assessment 40
External Assessment: 60****Instructions for paper setter**

The question paper will consist of two sections A and B. Sections B will have Six questions and will carry 10 marks each. Section A will have 10 short answer type questions, which will cover the entire syllabus uniformly and will carry 20 marks in all.

Instructions for Candidates

Candidates are required to attempt four questions from section B and the entire section A. Use of non-programmable scientific calculator is allowed

Introduction: Internet Architecture board, understanding the internet.

Concept: Working, Surfing and security on the internet.

Internet protocols Internet addressing, internet routing protocols internet message protocol, internet group management protocols, internet mail protocol.

Internet applications: E-mail, multi cost backbone, net news.

Web: World Wide Web advantages of web, web terminology, web access using web browser, locating information on the web.

Introduction to Java: Applets, application & JDK, different b/w Java & C++, working with Java objects: Encapsulation, inheritance & polymorphism, constructors. Garbage collection & finalisers, data types, modifies & expressions, array & flow control statements. Exception handling threads, event handling, network programming & Java virtual machines, Java & databases.

Software Lab – X (Major Project Phase – II)

BC-603(N2)

Max. Marks 100
Internal Assessment 40
External Assessment 60

Continuation of Major Project started in V semester (Code Generation, system testing, Installation and operations & maintenance)

Note: The break up of marks for the practical will be as under

Viva Voce	15 marks
System development	45 marks

Practical Software Lab – XI (Web Designing)

BC-604(N2)

Max. Marks 100
Internal Assessment 40
External Assessment 60

Design a Web Page using HTML / DHTML / ASP

Note: The break up of marks for the practical will be as under

Lab Record	15 marks
Viva Voce	15 marks
Program development And execution	30 marks

Practical Software Lab - XII

BC-605(N2)

Max. Marks 100
Internal Assessment 40
External Assessment 60

Paper- BC-602

Perform following operations on Novel Netware.

- ❖ Installation & configuration.
- ❖ Managing resources and users.
- ❖ Granting access rights to users

Perform following operations on Windows NT Server.

- ❖ Workgroup & Domain, Choosing Disk Configuration, Choosing Windows NT protocols.
- ❖ Installation Windows NT server, windows NT & registry, control panel, configuring protocols & binding, network adapters, peripherals & devices, hard disk, printing & its client computer.
- ❖ Managing users & group account, policies & profiles, system policy with system policy editor, disk resources, working with Windows NT, file resources, UNC.
- ❖ Connectivity: interoperating with NetWare, configuring remote access services.

Seminar

BC-606(N2)

**Max. Marks 100
Internal Assessment 100**

Paper- BC-603(N2)

Seminar based on any Industrial Assignment.

Note: - The break up is as follows:

Report:	40 marks
Presentation:	60 marks

Comprehensive Viva Voce

BC-607(N2)

Max. Marks 100
External Assessment 100

Viva of Full syllabus studied under BCA course.

Format of Project Report

- Title Cover
- Certificate from organization about your stay (Project Duration) at that place and about submission of work done under external guide at the place of training.
- Certificate from your guide about the submission of work done under his/her guidance, Internal Supervisor.
- Table of Contents, abstract of the project (abstract of actual workdone).
- A brief overview of the organization (regarding function area, location, division in which you are working, turnover)
- Profile of problems assigned.
- Study of existing system, if any.
- System requirements
 - Product Definition
 - Problem Statement
 - Function to be Provided
 - Processing Environment: H/W, S/W.
 - Solution Strategy
 - Acceptance Criteria
 - Feasibility Analysis
 - Project Plan
 - Team Structure
 - Development Schedule
 - Programming Languages And Development Tools
- System Requirement Specifications

- Developing / Operating / Maintenance Environments
- External Interface And Data Flows
 - User display and report format, user command summary
 - High level DFD and data dictionary
- Functional and performance specifications
- Design
 - Detailed DFD's and structure diagrams
 - Data structures, database and file specifications
 - Pseudocode
- Test Plan
 - Functional, Performance, Stress tests etc.
- Implementation / Conversion Plan
- Project Legacy
 - Current status of project
 - Remaining areas of concern
 - Technical and managerial lessons learnt
 - Future recommendations
- Bibliography
- Source Code (if available)

Note: - The above is meant to serve as a guideline for preparation of your project report. You may add to, modify or omit some of the above-mentioned points depending upon their relevance to your project. You may also consult your internal supervisor for the same.
